Shari's work is done from the inside out, partially from her thoughts and partially from her heart. There are endless influences that keep her work in motion, yet maintain the integrity of her identity. Things she incorporates may be illusionary, optical, three dimensional, symbolic, abstract, philosophical, whimsical, or scientific and will generally evoke emotion from the viewer. She likes to play with color, motion, lack of color, positive and negative space, balance, symmetry and asymmetry. You will almost always find at least one jewel to put a spark in her work. Many paintings are accompanied by poetry written before, during, or after the visual is born. A rare trait she has is that of mirror writing., which is sometimes incorporated in her pieces as secret messages. Her unique signature is written in reverse. (Da Vinci had that ability. However she does not compare herself in any other way to his genius.)

Shari has a business "Your Write Hands" in which she offers writing services, web pages and Facebook postings, and creates videos for businesses to display their products, and services. Her personal videos for use as gifts for a birthday celebration, or other occasions have been a delight to those who received them, and to their viewers.

Original artwork greeting cards have been popular item, as well as her editorial inserts.

Needle felting has become a passion, because of the combination of vibrant colors, texture, three dimension, and soft design possibilities.

Her original artwork cards are being featured at CR Antiques (Possibilit-teas), 26590 Hwy. 88, Pioneer.
